HANDLEIDING

Beste modelbouwer,

Bedankt voor de aanschaf van een Farmmodels bouwpakket.

U heeft hier de gedetailleerde beschrijving van uw bouwkit in schaal 1:32.
In fases wordt stap voor stap uitgelegd hoe u alle onderdelen samenstelt.

Lees eerst alle fases goed door, voordat u begint.

Het meeste freeswerk zit in de plaat vast met "bridges", dat zijn kleine stukjes om de gefreesde onderdelen in de plaat vast te houden.

Snij door deze bridges heen om de onderdelen los te maken.

Schoon daarna waar nodig het freeswerk op, verwijder eventuele resten en vijl alle scherpe hoeken / randen wat af.

Dat bevordert later het spuitwerk...

In deze beschrijving is niet aangegeven wanneer u het beste onderdelen van kleur / verf kunt voorzien, daar dit afhankelijk is van de door u gekozen kleurstelling. Hou daar zelf rekening mee tijdens de bouw.

Belangrijk is de juiste soort lijm te gebruiken.

Wij adviseren 2 soorten lijm:

Modelbouwlijm voor polystyreen (plastic / kunststof) is Revell Contacta en secundelijm / industrie lijm.

Gedurende de bouw wordt verteld met welke lijm gewerkt dient te worden.

Deze handleiding is zo goed mogelijk samengesteld.

Mocht u derhalve toch vragen hebben, of punten opmerken ter verbetering van de handleiding, kunt u ons mailen op info@farmmodels.nl.

Wij wensen u veel "modelbouw" plezier met het samenstellen van dit model.

Met vriendelijke groet,
Team Farmmodels.nl

MANUAL Beet sower

Dear modeller,

Thank you for purchasing a Farmmodels kit.

Here you have the detailed description of your kit in scale 1:32.

The manual explains all the stages step by step how to use the different parts.

Please read all stages thoroughly before you begin.

Most parts in this kit are attached on a plate with 'bridges'.

This is to protect the parts from damaging.

Cut through these bridges in order to detach the parts.

Clean up the parts where necessary and remove any residue and file all sharp corners/edges.

This kit does not indicate at what point you should colour/paint the parts, because this depends on your choice of colour palette.

Keep that in mind during the construction of your model.

It is important to use the right type of glue.

We recommend two types of glue:

Model making glue for polystyrene (plastic) Revell Contacta and superglue/industrial glue.

This manual has been prepared with great care and preciseness.

Should you therefore still have questions or points for improvement concerning the manual, please contact us by e-mail via info@farmmodels.nl

We wish you good "modeling" fun with composing this model.

Sincerely,
team Farmmodels.nl

Benodigdheden voor de bouw:

Voor de bouw van onze kitjes is het makkelijk om over het volgende gereedschap te beschikken:

* Revell mes of Stanley mes

* Vrijl en schuurpapier

* Pincet

* Zijkniptang

* Punt tang

* diverse (staal) boortjes

• Lijm

○ Modelbouwlijm,

○ Secondelijm

Advies: Revell Vloeibare plasticlijm.

Deze lijm droogt niet direct en geeft de mogelijkheid om delen te positioneren.

Advies: Farmmodels super lijm.

Deze lijm droogt direct zodat delen niet lang vastgehouden hoeven te worden.

Gedurende de bouw wordt aangegeven welke lijm het meest geschikt is.

1: **Start:**
12x

11:

17:

18:

Maak nu dit onderdeel in spiegelbeeld
Now make this part mirror imaged

19:

20:

21:

22:

23:

24:

Aluminium pijp, lengte 13 mm
Ø 2 mm
Aluminum pipe, length 13 mm

Maak nu dit onderdeel in spiegelbeeld
Now make this part mirror imaged

25:

2x

26:

45°

27:

28:

29:

30:

Maak nu dit onderdeel **2x** in spiegelbeeld
Now make this part **2 times** mirror imaged

31:

160°

32:

IJzerdraad, lengte 11 mm
Ø 0.95 mm
Iron wire, length 11 mm

33:

Maak nu dit onderdeel in spiegelbeeld
Now make this part mirror imaged

37:

38:

Zorg dat dit onderdeel exact evenredig loopt aan de bok
Make sure this parts is lined up evenly with the triangle part

39:
